To: Denise Bickerstaff
Fr: Jose Zepeda
Re: Summary of Findings
Property: 1550 Loma Vista St Pasadena 91104

Hi Denise,

This is the Summary of Findings based on my observations of the foundation system that I performed for you. After you have read through this, feel free to give me a call to get any further questions answered and/or to discuss scheduling.

As a preface to the prescription we're calling for, it is important to realize that we are isolating what we consider to be the "worst offenses" in this foundation system. In that spirit, we are offering to perform remedial repairs on those specific areas only. This is not intended to be an exhaustive list of everything that *could* be corrected or improved, but rather is designed to select out those areas considered to be in need of correction at this time. Every older foundation has more that could be done to it to improve it, but

Phone: 323.663.4841 Fax: 323.663.4844

Email: info@thefoundationworks.com

2411 W Empire Ave Burbank CA 91504

Website: www.thefoundationworks.com

License #876769

our objective is to isolate and improve the specific areas that are most in need of attention. The judgment employed in this approach is meant to create a prescription unique to this particular property, effective foundation solutions designed to extend the overall useful life of this particular foundation system as a whole.

Aside from the issues we are calling for correction of at this time, there was also a portion of the foundation (walk-in basement section) that was not viewable due to foundation walls being covered by a layer of mortar (cement-based product).

Due to this current inability to visually inspect these areas, there is the chance that damage to the foundation could be discovered that would warrant repair. If so, this could become an extra sum over the total contract amount, below. We do need to mention it, as it is a possibility. With this as the exception, the price quoted below is the final job fee and will not increase.

The perimeter foundation walls are made of rock. Rock foundations are bonded together between the individual rocks with a cement-based material known as mortar. I found the rock and mortar to be in acceptable condition, and am not calling for any corrective work at this time. Realize that these foundation walls are original to the building and do show typical wear and tear, including flaking and aging, but are considered to be performing adequately to date.

Note: while we found the rock foundation to be in acceptable condition, rock foundations cannot be bolted for seismic preparedness. In short, this home cannot be seismically retrofitted. As an aside to this, rock foundations of this kind are not built being reinforced. For this reason, we do recommend a sister wall foundation along the perimeter of the house as an upgrade. I will detail more about this upgrade a little later in this summary.

The various wood framing members that make up the under-floor area of the home were also found to be in acceptable condition. Whereas the type and design of the framing is indicative of the era in which the home was built, it was found to have performed acceptably to date. Whereas there are upgrades possible with any older home, the structure has performed fundamentally well in terms of the original design intent-with the exception of a few support issues I will be detailing later in this summary.

In terms of the overall condition of the foundation system, there are some issues of concern that we are calling for remedial repair on. In order to help clarify the prescription of repairs, I will detail my concerns and the corrections I'm advocating for them.

1. An issue to be corrected is part of the support structure under the house, called a post and pier assembly. In simple terms, this is a vertical wooden post that sits atop a concrete pad which in turns rests directly on the soil beneath the building. These two items together support a large wooden beam called a girder, which itself supports a section of the structure above it. At present, there are a couple girder beams under rear-right quadrant of the house that are not properly being supported. At present, these girder beams are being supported by metal framing clips with a few screws. These metal framing clips are not fully wrapped around the girder beams thus needing proper support. For this reason, we will be installing (8) new post and pier assemblies under the girders to take on the duty of the substandard support currently present under the house.

The new post and pier assemblies will consist of the following:

- A solid pour of concrete, minimally 12" x 12" in width and 18" in depth.
- Protruding from the top of each cement pour will be a precast concrete pier with metal brackets. This will be embedded in the concrete when it is poured.

- New, pressure treated 4” x 4” wood posts will be positioned vertically above each new concrete pier and fastened to the pier via the metal straps noted in step # 2 above.
 - The 4” x 4” post lumber will in turn be well secured to the existing girders already present in the home. This connection will be accomplished via a metal “LTP4” strap on each side of the assembly.
2. As mentioned earlier, these are the steps to upgrade the existing rock foundation with a concrete sister wall foundation.

To define sister wall, it is a technique where we will be creating a secondary foundation directly adjacent to the existing wall that will act to take on the duties of the current rock foundation. To achieve this, we will excavate to minimally 18” below grade, set reinforcing steel and a new sill plate with correct hardware spaced every 6’ for a one-story house. We will then build a wood form alongside the isolated section. Concrete will then be poured into the wood form, effectively creating a new concrete foundation.

Inherent in the sister wall work, the following upgrades are being performed on this building. I have calculated the building precisely based on the City of Los Angeles’ “minimum prescriptive standards” for this type of work. (I realize that the home is located in Pasadena, but they have not adopted their own standard for this type of work, and instead, accept the Los Angeles city standards.) This will include a full complement of the primary facets to a correct “bolting” job for this type of structure which are:

- The anchor bolts / anchor plates / anchor straps themselves (installed not more than 6’ apart all the way around the perimeter).
- Wood blocking at the floor joist ends where needed.
- Metal framing clips every 32” at the perimeter where required.

- A full and proper cleanup and haul-away of any debris created.
- A city permit for all aspects of the retrofit, including a guaranteed sign-off from the city.

The cost of the above repairs (\$2,400), admin fees, and the sister wall foundation upgrades (\$87,960) comes to \$90,360. **Note: All permit fees paid by owner. Permit fees not included in the project cost below.** There are two payment plan options on this, as follows:

OPTION A: Repairs and the voluntary seismic retrofit work (sister wall foundation). \$90,360

\$1,000 down upon acceptance of this proposal and the setting of a start date.
10% (\$9,036) due 14-days prior to commencement of the on-site work
30% (\$27,108) due two days after commencement of the on-site work.
30% (\$27,108) due when the city inspector authorizes us to pour the new foundation.
20% (\$18,072) due upon completion of the work.
The remaining balance (\$8,036) due after the city inspector has signed off on the permit verifying that the work is correct and complete.

OPTION B: Repairs only, exclude the voluntary seismic retrofit work (sister wall foundation). \$2,400

10% (\$240) down upon acceptance of this proposal and the setting of a start date.
90% (\$2,160) due upon completion of the work.

Note: any plumbing obstructions that are in the way of the sister wall upgrades must be relocated by qualified tradesman contracted by the owner.

Another facet of foundation maintenance you should be aware of is drainage. By drainage I primarily mean rainwater and where it is running to or where it is being directed. The reason this is relevant to this foundation is because moisture is the chief cause of foundation settlement. Our objective is to not only repair the foundation damage when necessary, but also to guide you toward taking action regarding the needed corrections that will help prevent future foundation issues from occurring. Although drainage corrections are beyond the scope of services that The Foundation Works provides, it is important that you follow up on the drainage issues and get proper drainage in place to help reduce the likelihood of additional damage occurring in the future. Realize that even after both foundation and drainage are corrected, it may take up to 3-4 years before the building will achieve its resting point and surface damage will lessen or diminish altogether.

Due to the expansive quality of certain types of soil, you should expect that there will be a degree of activity present in the building even after proper drainage is achieved; re-appearing or worsening of wall cracks, binding doors, trim separation, exterior stucco cracking, etc.

While we understand that this can certainly be a point of frustration, it is yet a reality of an older home built on soil that expands and contracts in a 12-month seasonal cycle. This cannot be over-stated; there may be wall cracks even after both foundation and drainage corrections have been performed, as this 12-month cycle of expansion-contraction can sometimes take a number of years (3-4 years in some cases) to finally minimize out to where the framing stabilizes as the soil finally achieves its resting point. The more that can be done to mitigate the annual cycle of saturating the soil under and or adjacent to the home, the lower the likelihood of any such adverse effects occurring in the future.

We look forward to the opportunity to display our level of quality to you. Though foundation repair is not a very visible trade, I assure you that we take the work very seriously as we know that you are relying on us to perform adequate repairs to help stabilize and protect your home well into the future.

Sincerely,

Jose Zepeda, Inspector

ACCEPTANCE OF PROPOSAL

The above prices, specifications, and conditions are satisfactory and are hereby accepted. You are authorized to do the work as specified. Payment will be as outlined above. In agreeing to have you perform work on this property, I also agree to allow you to place a small yard sign at the front area of the property upon commencement of work and to keep it there for approximately 30 days from the time the work is completed.

Please type the letter option you prefer (Option A, B):

☐

CLIENT: _____ DATE: _____

NOTE: This proposal may be withdrawn by us if not accepted within 45 days of the proposal date.

The down payment may not exceed \$1,000.00 or 10 percent of the contract price, whichever is less.

Owner shall pay Contractor the fixed sum listed above as Contract Price for the work performed under this contract, subject to additions and deductions pursuant to change orders agreed upon in writing by both parties.

This Contract and its attachments constitute the entire agreement between the parties. There are no other agreements, oral or written, pertaining to the work to be performed under this Contract. This Contract can be modified only by an agreement in writing signed by both parties.

You are entitled to a completely filled-in copy of this agreement, signed by both you and the contractor/agent, before any work may be started. Property Owner/agent for same acknowledges receipt of a complete, signed and legible copy of this Contract:

The law requires that the Contractor give you a notice explaining your right to cancel.

Initial the checkbox if the Contractor has given you a copy of Attachment "B", 'Notice of the Three-Day Right to Cancel':

Notice of Cancellation may be mailed to the address at the bottom of the contract. See attachment B Notice of Three-Day Right to Cancel.

Initial _____

CONSUMER NOTICES, TERMS AND CONDITIONS

Note About Extra Work and Change Orders

Extra Work and Change Orders become part of the contract once the order is prepared in writing and signed by both parties prior to the commencement of any work covered by the new change order. The order must describe the scope of extra work or change, the cost to be added or subtracted from the contract, and the effect the order will have on the schedule of progress payments.

If Owner or his agents or any public body or inspector directs any modification or addition to the work covered by this Contract, the Contract Price and time of performance shall be adjusted accordingly. Payments for extra work shall be made as the work progresses, concurrently with progress payments. Work or expenses necessitated as a result of Contractor encountering conditions at the Project site which:

(a) are subsurface or otherwise concealed conditions which differ materially from those indicated in the plans and specifications, or in the event that work was necessitated to maintain job progress (i.e. added foundation depth, detail changes, required excavation, etc). Expense incurred because of adverse ground conditions whether expressed in a separate Soils Report or not such as fill, hard soil, below-ground infrastructure or cementitious obstacles, rock or ground water (hard soil is defined as material unable to be excavated by conventional auger bit using equipment in use at time of construction or for hand excavation, less than 3 cubic yards removed per man per day, shall be paid for by owner as extra work. Casing of holes, de-watering or other added work shall be extra work.

(b) are unusual and differ materially from those ordinarily encountered on construction activities of the kind described in the plans and specifications, shall be deemed extra work and shall be paid for by Owner in accordance with this Paragraph.

Contractor shall not be required to perform any extra or change-order work without prior written authorization of Owner, but Contractor shall be entitled to be paid for extra work whether authorization is given in writing or not. Signed change orders shall be incorporated into and become a part of this Contract.

Further exclusions: OSHA requirements, damage to sidewalks, walkways, streets, curbs, caused by construction, added depths of foundations, as-builts, topo map, electrical, low voltage wiring, plumbing, HVAC or duct work, planters, acoustic ceiling, additional design/correction details, inspection reports.

WORKERS' COMPENSATION INSURANCE

This contractor carries workers' compensation insurance for all employees.

PERMITS AND TESTS

Unless otherwise agreed to in writing by both parties, the Contractor shall procure the necessary permits for the work. Owner shall pay the governmental fees and Contractor's charges for said permits. If any tests or inspections are required by the plans and specifications or by the orders of any public authority having jurisdiction, Owner agrees to procure said tests and inspections in a timely manner and to pay all costs and fees associated with them.

RIGHT TO STOP WORK

Contractor shall have the right to stop work if any payment, including any payment for extra work, is not made to Contractor as agreed in this Contract. If any payment required under this Contract is not made when due, Contractor may keep the Project idle until such time as all payments due have been made.

PERMISSIBLE DELAYS

Contractor shall be excused from any delay in the completion of the work to be performed under this Contract caused by Mother Nature, inclement weather, acts or omissions of Owner or of Owner's agents, employees or independent contractors, material shortages, strikes or other labor troubles, acts of public utilities, acts of public bodies or inspectors (unless related to defects in Contractor's performance), extra work, changes requested by Owner, failure by Owner to make payments promptly, tenant or other vehicles or other personal property blocking Contractor from performing work, or other circumstances or contingencies unforeseen by Contractor and beyond Contractor's reasonable control.

Initial _____

PLANS, SPECIFICATIONS AND PERMITS

The project will be constructed according to plans and specifications which have been examined by the Owner. Building permits and expediting fees shall be paid for by Owner unless otherwise specified on preceding page. Owner will pay assessments and charges required by public bodies and utilities as apply. Owner shall pay for geotechnical fees, special inspection fees, and engineer fees unless otherwise stated on preceding page.

LABOR AND MATERIAL

Contractor shall pay all valid charges for labor and material incurred by Contractor and used in the construction of the project but is excused by Owner from this obligation for bills received in any period during which Owner is in arrears in making progress payments to the Contractor.

Should Contractor fail to make payments required under this paragraph, Owner may make such payments on behalf of Contractor, and Contractor shall reimburse Owner for the amount actually paid on demand, but Owner shall not, by means of assignment or otherwise be entitled to collect any greater amount from Contractor than the amount actually paid for labor and material under this paragraph.

No waiver or release of mechanics lien given by Contractor shall be binding until all payments due to Contractor when the release was executed have actually been made.

CONTRACT, PLANS AND SPECIFICATIONS

The contract, plans and specifications are intended to supplement each other in case of conflict, however, the plans shall have control over the specifications, and the provisions of this contract shall control both.

DESIGN BUILD

The Contractor (The Foundation Works) owns the rights to the plans until the construction phase has been paid in full.

COSMETIC WORK

No cosmetic work whatsoever shall be undertaken unless expressly written on previous page under "Includes". Cosmetics, for the purposes of this agreement, include stucco, paint, siding, doors, windows, moldings, hardwood flooring, carpeting, plants, landscaping or hardscape, plaster cracks or other damage caused by but not limited to performed work such as house jacking, dry wall work, brick work, stone work, soft-story retrofitting.

House jacking - Raising floor planes is an inexact means of correcting settled floors visually. "Level" is not the standard but rather an approximation of 1" drop in 20 linear feet and this is only a guide and may possibly not be achieved. The effort is a flatter looking floor, not a "level" floor. Contractor will make the final determination as to when the building has achieved the degree of level that in its estimation, is the attainable amount without in fact causing more damage than the resulting additional efforts would achieve.

OWNER INDEMNIFICATION

The Contractor hereby agrees to hold the Owner harmless and to indemnify the Owner against any and all claims which may arise during the course of the work as a consequence of the negligent acts or deliberate omissions of the Contractor, its agents, or employees.

CONTRACTOR INDEMNIFICATION

The Owner hereby agrees to hold the Contractor harmless and to indemnify the Contractor against any and all claims which may arise during the course of the work as a consequence of the negligent acts or deliberate omissions of the Owner, its agents or employees.

Initial _____

OWNER'S RIGHT TO REQUIRE BOND

Owner has the right to require Contractor to have a performance and payment bond. The expense of such bond will be borne by Owner.

FINAL INSPECTION

It is possible that the Final Inspection is linked to work outside the scope provided by The Foundation Works, such as stucco, mechanical, or other work. In this case, it is only the completion of work as expressed by this agreement that needs to be complete to execute final payment.

DAMAGE TO PROJECT AND INSURANCE

Owner will procure at his own expense and before the commencement of any work hereunder, fire insurance with course of construction, vandalism, and malicious mischief clauses attached, such insurance to be in a sum at least equal to the contract price with loss, if any, payable to any beneficiary under any deed of trust covering the project, such as insurance to name Contractor as an additional insured, and to protect Owner, Contractor and construction lender as their interests may appear; should Owner fail to do so, Contractor may procure such insurance as agent for and at expense of Owner, but is not required to do so. If the project is destroyed or damaged by an accident, disaster or calamity, such as storm, flood, landslide, subsidence or earthquake, or by theft or vandalism, any work done by Contractor in rebuilding or restoring the project shall be paid for by Owner as extra work.

Contractor will maintain in full force and effect a workers' compensation insurance policy in amounts not less than required by the specifications, or, as noted under payments, first page, and shall make available such Certificate of Insurance to Owner before commencing work. The failure of Owner to demand delivery of certificate hereunder shall not relieve Contractor of any obligation under this paragraph.

CLEAN-UP

Upon completion of the work, Contractor will remove debris and surplus material from Owners property and leave it in a neat and broom-clean condition unless otherwise stated in this contract.

TAXES AND ASSESSMENTS

Taxes and special assessments of all descriptions will be paid for by Owner.

NOTICE

Any notice required or permitted under this contract may be given by ordinary mail at the address contained in this contract, but such address may be changed by written notice given by one party to the other from time to time. After a notice is deposited in the mail postage prepaid, it shall be deemed received in the ordinary course of the mail.

BANKRUPTCY

If either party becomes bankrupt, or makes an assignment for the benefit of creditors, the other party has the right to cancel this contract.

Initial _____

ATTORNEY FEES

If either party becomes involved in litigation arising out of this contract or the performance thereof, the court in such litigation, or in a separate suit, shall award reasonable costs and expenses, including attorney fees to the party justly entitled thereto. In awarding attorney fees, the court will not be bound by any court fee schedule, but shall, if it is in the interest of justice to do so, award the full amount of costs, expenses and attorney fees paid or incurred in good faith.

MEDIATION

Unless otherwise agreed upon by the parties in writing, any controversy arising out of the construction of the project referred to in this contract shall be subject to a good faith mediation conducted by and in accordance with the rules of the American Arbitration Association. Mediation shall take place prior to the commencement of arbitration, but in no event later than (60) days after the first demand for arbitration is filed by one of the parties. Mediation shall be governed by the confidentiality requirements contained in California Evidence Code Section 1152.5. Should mediation fail, the parties shall arbitrate their dispute according to the terms of Section 17h, intra, but unless otherwise agreed by the parties, the arbitrator shall not be the same person who conducted the mediation.

ARBITRATION

Any controversy arising out of the construction of the project referred to in this contract or regarding the interpretation of this contract shall be subject to arbitration in accordance with the applicable Construction Industry Arbitration Rules of the American Arbitration Association which are in effect at the time the demand for arbitration is filed. Should any party refuse or neglect to appear or participate in an arbitration proceeding, the arbitrator is empowered to decide the controversy in accordance with whatever evidence is presented. The arbitrator is authorized to award any party or parties such sums as he or she shall deem proper for the time, expense and trouble of arbitration.

Contractor agrees that its subcontractors will contain an arbitration provision providing that any controversy arising out of the construction of the project referred to in this contract shall be subject to arbitration by and in accordance with the applicable Construction Industry Arbitration Rules of the American Arbitration Association which are in effect at the time the demand for arbitration is filed. Contractor agrees that by subcontract, it will require its subcontractors to agree, upon request of Owner or Contractor, to join as parties to arbitration pursuant to this agreement, between Owner and Contractor, and to issue only subcontracts which contain like provisions, as to its subcontractors.

ARBITRATION OF DISPUTES. NOTICE: BY SIGNING THE CONTRACT YOU ARE AGREEING TO HAVE ANY DISPUTE ARISING OUT OF THE MATTERS INCLUDED IN THE "ARBITRATION OF DISPUTES" PROVISION DECIDED BY NEUTRAL ARBITRATION AS PROVIDED BY CALIFORNIA LAW AND YOU ARE GIVING UP ANY RIGHTS YOU MIGHT POSSESS TO HAVE THE DISPUTE LITIGATED IN A COURT OR JURY TRIAL. BY SIGNING THE CONTRACT, YOU ARE GIVING UP YOUR JUDICIAL RIGHTS TO DISCOVERY AND APPEAL, UNLESS THOSE RIGHTS ARE SPECIFICALLY INCLUDED IN THE "ARBITRATION OF DISPUTES" PROVISION. IF YOU REFUSE TO SUBMIT TO ARBITRATION AFTER AGREEING TO THIS PROVISION, YOU MAY BE COMPELLED TO ARBITRATE UNDER THE AUTHORITY OF THE BUSINESS AND PROFESSIONS CODE OR OTHER APPLICABLE LAWS. YOUR AGREEMENT TO THIS ARBITRATION PROVISION IS VOLUNTARY.

ESCROW ACCOUNTS

The Foundation Works reserves the right to require that a separate fund control or escrow account be established to guarantee funding of said project at Owners' expense.

Initial _____

MECHANICS LIEN WARNING

Anyone who helps improve your property, but who is not paid, may record what is called a mechanics' lien on your property. A mechanics' lien is a claim, like a mortgage or home equity loan, made against your property and recorded with the County Recorder. Even if you pay your Contractor in full, any unpaid subcontractors, suppliers, and or laborers who helped to improve your property may record mechanics' liens and sue you in court to foreclose the lien. If a court finds the lien is valid, you could be forced to pay twice or have a Court Officer sell the subject property to pay the lien. Liens can also affect your credit. To preserve their right to record a lien, each subcontractor and material supplier must provide you with a document called a "20-day Preliminary Notice." This notice is not a lien. The purpose of the notice is to let you know that the person who sends you the notice has the right to record a lien on your property if he or she is not paid.

BE CAREFUL

The Preliminary Notice can be sent up to 20 days after the subcontractor starts work or the supplier provides material. This can be a big problem if you pay your contractor before you have received the Preliminary Notices. You will not get Preliminary Notices from your prime contractor or from laborers who work on your project. The law assumes that you already know they are improving your property.

PROTECT YOURSELF FROM LIENS

You can protect yourself from liens by getting a list from your Contractor of all the subcontractors and material suppliers that work on your project. Find out from your Contractor when these subcontractors started work and when these suppliers delivered goods or materials. Then wait 20 days, paying attention to the Preliminary Notices you receive.

PAY WITH JOINT CHECKS

One way to protect yourself is to pay with a joint check. When your Contractor tells you, it is time to pay for the work of a subcontractor or supplier who has provided you with a Preliminary Notice, write a joint check payable to both the Contractor and the subcontractor or material supplier. For other ways to prevent liens, visit CSLB's Web site at www.cslb.ca.gov or call CSLB at 800-321-CSLB (2752). REMEMBER, IF YOU DO NOTHING, YOU RISK HAVING A LIEN PLACED ON THE SUBJECT PROPERTY. This can mean that you may have to pay twice or face the forced sale of the subject property to pay what you owe.

RELEASE OF MECHANICS' LIENS

Upon satisfactory payment being made for any portion of the work performed, Contractor shall, prior to any further payment being made, furnish to Owner a full and unconditional release from any claim or mechanic's lien pursuant to Section 3114 of the California Civil Code, for that portion of the work for which payment has been made.

CONTRACTORS REQUIRED TO BE LICENSED

Contractors are required by law to be licensed and regulated by the Contractors' State License Board which has jurisdiction to investigate complaints against contractors if a complaint regarding a patent act or omission is filed within four years of the date of the alleged violation. A complaint regarding a latent act or omission pertaining to structural defects must be filed within 10 years of the date of the alleged violation. Any questions concerning a contractor may be referred to the Registrar, Contractors' State License Board, P.O. Box 26000, Sacramento, California 95826.

INFORMATION ABOUT THE CONTRACTOR'S STATE LICENSE BOARD (CSLB):

CSLB is the state consumer protection agency that licenses and regulates construction contractors. Contact CSLB for information about the licensed contractor you are considering, including information about disclosable complaints, disciplinary actions and civil judgments that are reported to CSLB. Use only licensed contractors. If you file a complaint against a licensed contractor within the legal deadline (usually four years), CSLB has authority to investigate the complaint. If you use an unlicensed contractor, CSLB may not be able to help you resolve your complaint. Your only remedy may be in civil court, and you may be liable for damages arising out of any injuries to the unlicensed contractor or the unlicensed contractor's employees. For more information: Visit CSLB's Web site at www.cslb.ca.gov Call CSLB at 800-321-CSLB (2752)

Write CSLB at P.O. Box 26000, Sacramento, CA 95826.

ATTACHMENT B

NOTICE OF THREE-DAY RIGHT TO CANCEL

You, the buyer, have the right to cancel this contract within three business days. You may cancel by e-mailing, mailing, faxing or delivering a written notice to the contractor at the contractor's place of business by midnight of the third business day after you received a signed and dated copy of the contract that includes this notice. Include your name, your address, and the date you received the signed copy of the contract and this notice.

If you cancel, the contractor must return to you anything you paid within 10 days of receiving the notice of cancellation. For your part, you must make available to the contractor at your residence, in substantially as good condition as you received it, any goods delivered to you under this contract or sale. Or, you may, if you wish, comply with the contractor's instructions on how to return the goods at the contractor's expense and risk. If you do make the goods available to the contractor and the contractor does not pick them up within 20 days of the date of your notice of cancellation, you may keep them without any further obligation.

If you fail to make the goods available to the contractor, or if you agree to return the goods to the contractor and fail to do so, then you remain liable for performance of all obligations under the contract.

To cancel this transaction, mail or deliver a signed and dated copy of this cancellation notice, or any other written notice to The Foundation Works, at 2411 W Empire Ave, Burbank, CA 91504, not later than midnight of (date): _____

I hereby cancel this transaction
